

Genomics and Society: *Today's Answers, Tomorrow's Questions*

One Great George Street, Westminster, London

25-26 October 2007

Organised by ESRC Genomics Network

Showcasing five years of innovative social science research on genomics

- *Do biobanks offer the best route to a healthy population and a secure society?*
- *Is genomics just the latest 'technological fix' for the poor world?*
- *What is driving stem cell research?*
- *Will genomics revolutionise psychiatry and the understanding of the brain?*
- *Is 'getting a fair press' the key issue?*
- *Where will future drugs come from and will they be good for us?*
- *Am I my genome?*
- *Is biology being re-shaped by genomics and its successors?*
- *Can genomics help individuals to identify the 'right foods' to eat?*
- *How to make social research on family medicine accessible?*
- *Public consultation: more than window-dressing?*
- *Family histories or genetic testing?*
- *Dolly for dinner?*
- *Genomes for sale?*

The battle over ethics and regulation

26 October, 2pm, Debate hosted in association with the Institute of Ideas
